PHYSICAL EDUCATION

PERFORMANCE ASSESSMENT SUPPORT MATERIAL

VOLLEYBALL
**Assessment of practical student performance in Physical Education**

Authentic assessment must include tasks that are worthwhile, significant and meaningful, as well as involve the ongoing process of recording, monitoring and reflection to assist learning, monitor learning, set learning goals and help identify further practice opportunities in order for these to be achieved. Final assessment at the end of a teaching unit on the selected activity may be completed through monitoring of progress together with formalised assessment tasks.

When assessing students’ performance in a practical context, a teacher should refer to observation points for individual and game skills in the selected activity.

### Assessment of individual skills

Observation points for a skill must be taken into account holistically rather than by focussing on a detailed anatomy of its parts before deciding on a mark. It is essential that when assessing individual skills, observations reflect the quality of a student’s movement when performing. The teacher must take into account four elements in the demonstration of a skill: consistency; precision; fluency; and control.

Final assessment of the skill performance and level of attainment will be guided by the achievement standards for the appropriate year level as set out by the School Curriculum and Standards Authority.

**Breaking of sport specific rules**

When students are taught and given opportunities to practise and use various skills in a competitive scenario, the teacher should indicate to the student if a rule is consistently broken while performing the skill, e.g. double hitting when setting. If, at the time of assessment, a student consistently breaks the rules of the sport, but who otherwise performs at a particular standard, should have one mark deducted for each rule that is consistently broken.

### Assessment of game/competition skills

Tactical situations or problems appropriate to the year group should be identified before assessment of students’ performance. This may include defence or offence skills depending on the activity being assessed. Game pressure, pace, skill and intensity of opponent and teammates, playing area, environmental conditions etc. may affect performance and should be taken into account when assessing game/competition skills.

The teacher must take into consideration that contact, or possession, which provide the opportunity for individual skill assessment accounts for only a small percentage of game time. Most game time is spent in movement and performance of tactical/strategic skills ‘off the ball’.

Assessment should typically take into account the totality of game play, including the dynamic and changing situations associated with game play, by considering tactical products and processes which form part of the total composition of game/competition performance.

The range of marks or assessment scale will be determined by the teacher but must reflect expected achievement standards for that year group.
### Individual skills – marks allocation

A mark is allocated to the level of performance demonstrated consistently for each skill across a variety of practice drills and scenarios.

<table>
<thead>
<tr>
<th>Mark</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>6</td>
<td>Observation points across all phases of a skill are demonstrated over a number of attempts. Performance is fluent and control of the body and/or the ball is maintained throughout the execution of the skill.</td>
</tr>
<tr>
<td>5</td>
<td>Performance consistently reflects the majority of the observation points of a skill and is performed with some fluency. Control of the body and/or the ball is maintained.</td>
</tr>
<tr>
<td>4</td>
<td>Performance is mostly efficient with the ability to correct some errors during execution of a skill. The body and/or the ball are controlled during the majority of the performance.</td>
</tr>
<tr>
<td>3</td>
<td>Performance is somewhat effective while demonstrating most observation points, occasionally performing each skill with some fluency and control. Overall reflects an adequate skill level.</td>
</tr>
<tr>
<td>2</td>
<td>Achieves some success when performing a skill but commits a number of errors with respect to execution and control. Sometimes reflects an adequate skill level.</td>
</tr>
<tr>
<td>1</td>
<td>Performs with significant errors and minimal control. Rarely demonstrates an adequate skill level.</td>
</tr>
<tr>
<td>0</td>
<td>Minimum skill level is not demonstrated</td>
</tr>
</tbody>
</table>
### Individual skills

- Overhead float serve
- Jump serve
- Combined jump-float serve
- Forearm pass: free ball
- Forearm pass: serve reception
- Forearm pass: spike reception
- Front set
- Spike
- Block
- Back set

### Overhead float serve

**Preparation**
- Server stands behind the baseline
- Straight arms point towards target with hitting hand behind the ball
- Weight on the back foot ready to be transferred onto front foot upon contact
- Step is towards the target with the opposite foot
- Hitting arm is drawn straight back behind the head with elbow flexion

**Execution**
- The ball is tossed up with the opposite hand in line with the serving hand, little spin and less than 1m high
- Opposite foot forward when contact is made with the ball
- Contact with the ball is with an open hand, above the head in line with the serving arm

**Completion**
- Weight is transferred forward onto the court and move into a defensive position
- Arm follows through in the direction of the target; thumb brushing quadriceps on the same side as serving arm
- Ball has a flat trajectory and no spin (floating)
- Ball clears the net no higher than the top of the antennae

**Outcome**
- Ball follows appropriate trajectory
- Ball hits intended target

### Jump serve

**Preparation**
- Position behind the baseline at appropriate distance to allow approach routine
- Ball is tossed above the head with one or two hands in line with the serving hand
- Approach routine begins, including full jump with take-off from two feet (as per the spike approach)
- Hitting arm is drawn straight back behind the head with elbow flexion

**Execution**
- Ball is contacted with an open hand, above the head in line with the serving arm
- Wrist snaps to impart top spin

**Completion**
- Weight is transferred forward onto court and move is into a defensive position
- Arm follows through in the direction of the target with thumb brushing quadriceps on the same side as serving arm

**Outcome**
- Ball has top spin and dips as it crosses the net
- Ball lands in last metre and a half of court
### Combined jump-float serve

**Preparation**
- Position behind the baseline at appropriate distance to allow approach routine
- Approach routine begins, including full jump with take-off from two feet (as per the spike approach)
- The ball is tossed in front of the hitting shoulder and no higher than the antennae

**Execution**
- Hitting arm is drawn straight back behind the head with elbow flexion
- Ball is contacted with an open hand

**Completion**
- Weight is transferred forward onto the court and move is into a defensive position
- Arm follows through in the direction of the target; thumb brushing quadriceps on the same side as serving arm

**Outcome**
- Ball has a flat trajectory and no spin (floating)
- Ball clears the net no higher than top of the antennae

### Forearm pass: free ball

**Preparation**
- Move is to get the ball in line with the midline of the body and to face the target
- Balanced position with weight on the balls of the feet and outside foot forward
- Shoulders directed towards the target with arms forming a stable triangle
- As ball approaches, position is lowered with greater knee bend

**Execution**
- Arms should be straight and in the midline with a flat platform
- Body weight is moving up and forward as is all of body movement
- Body goes from a low position to a high position in a forward flowing movement
- All contact is on the forearm (above ‘watch strap’) with elbows fully extended

**Completion**
- Arms follow-through no higher than parallel to the court
- Ball travels on a parabola between the contact point and the setter

**Outcome**
- Ball lands in the area of the setter that gives them the opportunity to execute a set to a spiker

### Forearm pass: serve reception

**Preparation**
- Move is to get the ball in line with the midline of the body and to face the target or execute lateral pass if receiving a jump serve
- Balanced position with weight on the balls of the feet and outside foot forward
- Shoulders are directed towards the target with arms forming a stable triangle
- As ball approaches position is lowered with greater knee bend

**Execution**
- Arms should be straight with a flat platform
- Body weight is moving up and forward as is all of body movement
- Body goes from a low position to a high position in a forward flowing movement
- All contact is on forearm (above ‘watch strap’) with elbows fully extended. Note: Jump serve is received with very little arm movement to cushion the ball on impact

**Completion**
- Arms follow through no higher than parallel to the court
- Ball travels on a parabola between the contact point and the setter
<table>
<thead>
<tr>
<th>Movement is into the team-attack position</th>
</tr>
</thead>
</table>

**Outcome**
- Ball lands in the area of the setter that gives them the opportunity to execute a set to a spiker
- Approach shot: dynamic movement toward the target

<table>
<thead>
<tr>
<th>Forearm pass: spike reception</th>
</tr>
</thead>
</table>

**Preparation**
- A balanced ready position is assumed to receive a spike with a wide and low stance
- Arms are relaxed
- Weight moves onto the balls of the feet with shoulders forward in readiness to move into position

**Execution**
- Contact is such that the arms almost ‘give’ on contact to take power out of the ball
- Contact is on forearms with elbows extended
- Arms ‘break’ at the elbows in the ‘J’ shape to control the impact of the ball

**Completion**
- Ball is controlled on own-side of the court to form an attack
- Ball is kept high, in the middle of the court and towards the attack line

**Outcome**
- Ball lands in the area of the setter that gives them the opportunity to execute a set to a spiker
- Subsequent movement is into the team-attack position

<table>
<thead>
<tr>
<th>Front set</th>
</tr>
</thead>
</table>

**Preparation**
- Body is balanced with foot closest to the net slightly in front
- Knees and hips are flexed
- Hands are positioned slightly in front and above the head, forming a triangle
- Elbows are at 90° with thumbs pointing to the floor

**Execution**
- Hips and shoulders are facing the target
- Base is stable and knees flex on contact
- Ball is cushioned with all fingers and thumbs of both hands
- Elbows flex upon contact followed by extension to 180° leading to release

**Completion**
- Arms point in direction of the target as are the thumbs and forefingers
- Ball is released into a parabolic flight with no spin
- Next movement is into defensive position
- Player balanced and ready for reception
- Player controls the ball on impact

**Outcome**
- Ball follows appropriate trajectory
- Ball hits intended target
### Spike

#### Preparation
- Spike approach begins on or behind the attack line
- Spike approach footwork is R – L – together (opposite for left-hander)
- Knee bend is deep with arms swinging back parallel to the court
- Two-foot take-off is vertical and controlled
- Arms swing forwards and upwards to get maximum height in the jump
- Arms assume ‘bow and arrow’ position with hitting arm pulled back behind the body in a ‘bow’ position and non-hitting arm pointing to the ball

#### Execution
- Lead is with elbow first, then high contact with open hand on the ball, snapping the wrist on contact
- Contact is made at maximum height approximately 50cm in front of the body and in line with the hitting shoulder

#### Completion
- Two-foot landing is controlled with flexion of knees to absorb impact
- Landing is in the same place as take-off

#### Outcome
- Ball follows appropriate trajectory
- Ball hits intended target

### Block

#### Preparation
- Feet are shoulder-width apart and arm-length off the net
- Hands are in front of the body, at shoulder height and facing the opposition
- Fingers are spread
- Movement along the net is sideways and controlled

#### Execution
- Knees bend no more than 90°
- Knees are extended fully to jump vertically
- No gap is left between arms and net for maximum penetration
- Arms are kept straight and strong reaching over the net
- Thumbs should be high, fingers spread and hands close together to avoid ball going through the middle of both hands

#### Completion
- Two-foot landing is controlled with flexion of the knees to absorb impact and without any net touches
- Ready position is resumed

#### Outcome
- Ball is blocked back into opponent’s court or defensively back to their own team
**Back set**

**Preparation**
- Body is balanced with foot closest to the net slightly in front
- Knees and hips are flexed
- Hands are positioned more above the head than in the front set
- Elbows are at 90° with thumbs pointing to the floor

**Execution**
- Hips and shoulders are facing the target
- Base is stable and knees flex on contact
- Ball is cushioned with all fingers and thumbs of both hands
- Elbows flex upon contact followed by extension to 180° leading to release

**Completion**
- Arms point in direction of the target as are thumbs and forefingers

**Outcome**
- Ball is released into a parabolic flight with no spin
- Next movement is into a defensive position

**Game skills – marks allocation**

A mark is allocated to the level of performance demonstrated consistently for each element of offence and defence.

<table>
<thead>
<tr>
<th>Mark</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>5</td>
<td>Performance is consistent in offence and defence under pressure in a variety of competitive situations. Demonstrates the ability to control play and influence opponent’s performance. Selection of movement patterns and skills are effective in achieving the intended outcome.</td>
</tr>
<tr>
<td>4</td>
<td>Performance is usually effective in a variety of competitive situations under some pressure. Movement patterns and skills are often effective and achieve the intended outcome.</td>
</tr>
<tr>
<td>3</td>
<td>Performance is somewhat effective while demonstrating most components with some success. Overall reflects an adequate level of performance.</td>
</tr>
<tr>
<td>2</td>
<td>Achieves some success when performing in a competitive situation but commits a number of errors with respect to execution of skills and appropriate decision making. Sometimes reflects an adequate level of performance.</td>
</tr>
<tr>
<td>1</td>
<td>Performs with significant errors with respect to execution of skills and appropriate decision making. Rarely demonstrates an adequate level of performance.</td>
</tr>
<tr>
<td>0</td>
<td>Minimum level of performance is not demonstrated</td>
</tr>
</tbody>
</table>
