| Task preparation              |   |  |
|-------------------------------|---|--|
| Prior learning                | Students are familiar with the key concept of making choices, particularly the strategies for making informed consumer decisions. Students should also be familiar with how to locate and extract relevant information from a variety of sources.   |  |
| Assessment<br>differentiation | Teachers should differentiate their teaching and assessment to meet the specific<br>learning needs of their students, based on their level of readiness to learn and their<br>need to be challenged.<br>Where appropriate, teachers may either scaffold or extend the scope of the assessment<br>tasks. |  |
| Assessment task               |   |  |
| Assessment conditions         | The task is to be completed in pairs, but could be completed individually.  |  |
| Resources                     | Internet access   |  |

## Instructions for teacher

Prior to the task, students should be familiar with the Economics and Business key concept of making choices. The questions below may assist students to develop their conceptual understandings when introducing the concept.

Influences on consumer choices and factors that influence purchase decisions

- When considering purchasing an item, what factors might we consider?
- Do these factors change depending on the items we are considering purchasing?
- Which factors are the most important to consider before making a purchase and why?

Strategies for making informed consumer and financial decisions (comparing costs and benefits)

- How important is the convenience of an item before you decide to purchase?
- How important are the benefits you can obtain from the item as a deciding factor?
- If the item purchased could cause harm to the environment, would you still purchase it?
- When does cost to the environment become more important than the benefit to an individual when you are considering purchasing an item?

Students should also be familiar with how to extract data from various sources (e.g. internet sites). Teachers should have modelled processes to assist student with developing skills, including how to:

- extract the relevant information
- analyse the data
- reconstruct the data in other formats (e.g. visual representations)
- evaluate the data to apply decision-making processes
- draw and justify conclusions
- propose solutions.

# Economics and Business Bottled water – to buy or not to buy?

#### Name\_

Every decision to purchase products and/or services impacts on:

- families (e.g. cost, time, benefits)
- the broader community (e.g. profits a business makes, people a business employs)
- the environment (e.g. pollution, use of limited resources).

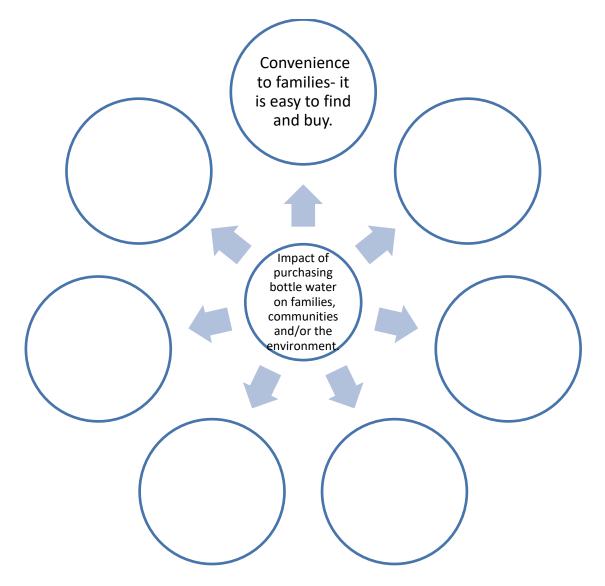

In this task, you will work in pairs to investigate the impact that purchasing bottled water may have on families, the broader community and the environment.

# Task 1

Complete the following diagram by investigating and noting different impacts (positive and/or negative) that the purchasing of bottled water has on families, the broader community and/or the environment (one has been done for you to help). You can add more circles to the diagram if you need to.

The following websites may be useful to get started:

- http://www.cleanup.org.au/au/Whatelsewesupport/avoid-bottled-water.html
- http://www.allaboutwater.org/environment.html.

## Task 2

It is clearly evident that the sale of bottled water leads to a lot of plastic waste that can be harmful to the environment. You are to write an article for your school newsletter or local newspaper to try to convince consumers not to buy bottled water due to the negative impact plastic waste has on our environment.

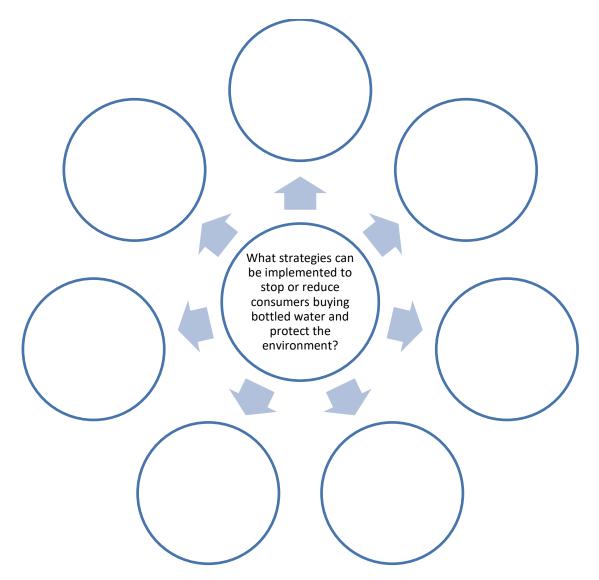

#### Task 3

Writing an article is a start to trying to change the behaviours of consumers, but sometimes it is not enough to change consumers' purchasing decisions.

Complete the following diagram by suggesting some other strategies that could be implemented to stop or reduce consumers buying bottled water and therefore protect the environment. You can add more circles to the diagram if you need to.

The following websites may be useful to help you get started:

- http://www.abc.net.au/btn/story/s2627619.htm
