

Sample assessment task	
Year level	7
Learning area	Technologies
Subject	Digital Technologies
Title of task	Stop motion movie
Task details	
Description of task	Students will create a stop motion movie from a series of photographs to demonstrate a concept from another class.
Type of assessment	Formative
Purpose of assessments	To assess students collaborative and creative skills to develop a stop motion movie using software
Assessment strategy	Practical evidence, observations, graphic organiser
Evidence to be collected	<ul style="list-style-type: none"> • Stop motion movie • Planning
Suggested time	5 x 1 hour lessons
Content description	
Content from the Western Australian Curriculum	<p>Knowledge and understanding</p> <p>Representation of data Digital systems represent text, image and audio data</p> <p>Processes and production skills</p> <p>Collecting, managing and analysing data Explore how to acquire data from a range of digital sources</p> <p>Collecting, managing and analysing data Create information using relevant software, and create data to model objects and/or events</p> <p>Investigating and defining Define and break down a given task, identifying the purpose</p> <p>Producing and implementing Safely make solutions using a range of components, equipment and techniques</p> <p>Collaborating and managing Work independently, and collaboratively when required, to plan, develop and communicate ideas and information when using management processes</p>
Task preparation	
Prior learning	Students are familiar with using software that will allow still images to be converted to a movie to create a stop motion movie
Assessment differentiation	<p>Teachers should differentiate their teaching and assessment to meet the specific learning needs of their students, based on their level of readiness to learn and their need to be challenged.</p> <p>Where appropriate, teachers may either scaffold or extend the scope of the assessment tasks.</p>

Assessment task

Assessment conditions	Students work collaboratively in groups of approximately 3–4 people per group.
Resources	<ul style="list-style-type: none">• Movie editing software• Tablet or digital camera

Instructions for teacher

1. Arrange students in groups or have them select their own groups of three to four students.
2. Students brainstorm possible ideas for their stop motion movie.
3. Each group should produce a stop motion movie on a different concept.
4. Still images for the stop motion movie should be original (e.g. with the use of digital camera or tablet).
5. Music, voice overs and sound effects can be added to help explain a concept, if required, and where appropriate.
6. Once the task is completed, have the students show their video to the whole class.

Worksheet/booklet for students

Task Description: Stop Motion Movie

Name _____

Working in groups of 3–4 per group, you are to create a stop motion movie to illustrate a concept you have learnt in another class; for example, you could create a movie to demonstrate:

- Maths: How to calculate the area of a given shape
- Science: What is a solar eclipse?
- HASS: How supply and demand determines the price of a product

You will need to plan and capture your own original images to complete the task.

Before you begin, what is a stop motion movie and how is it created?

Task planning:

I am working with _____

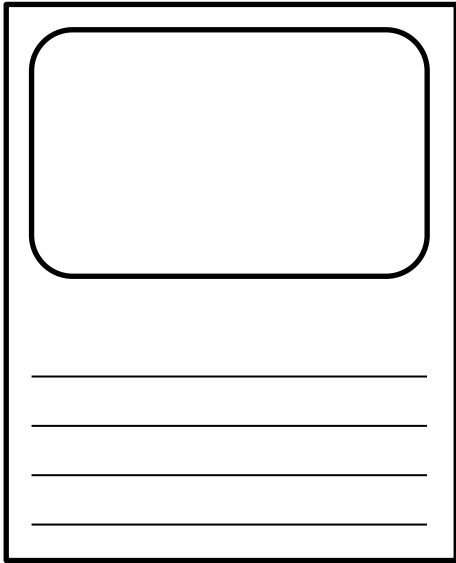

Movie topic _____

Software we will use _____

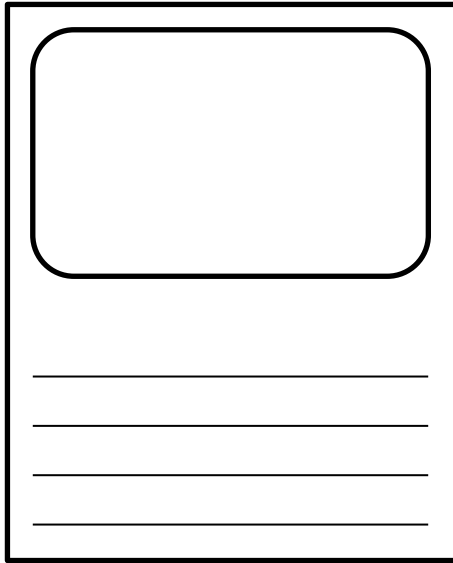

Resources we will need (e.g. camera, paper, pens, scissors, pictures of) and who will provide them:

What can we do to improve our final movie? (e.g. add sound effects, music)

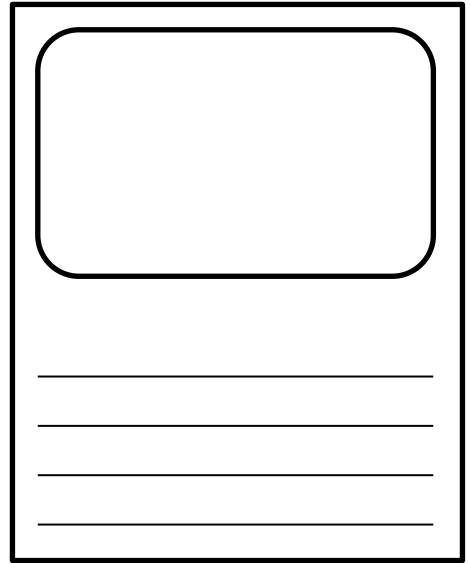

Storyboard

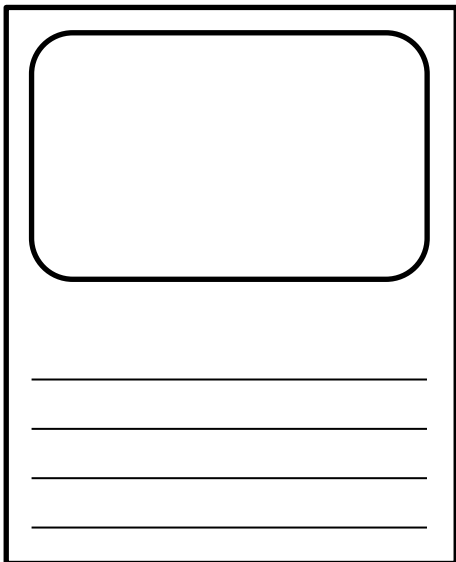

A storyboard panel consisting of a rounded rectangular frame at the top and four horizontal lines below it for text.

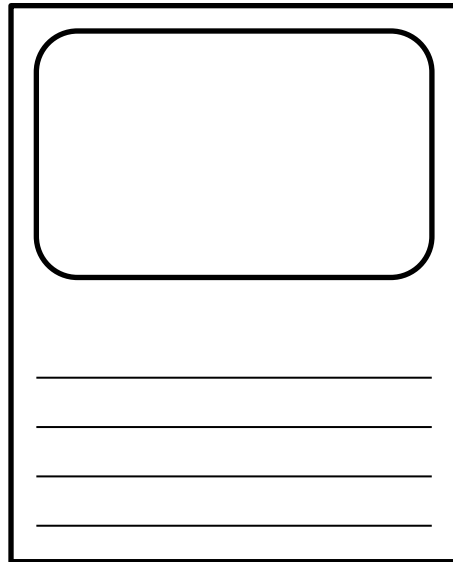

A storyboard panel consisting of a rounded rectangular frame at the top and four horizontal lines below it for text.

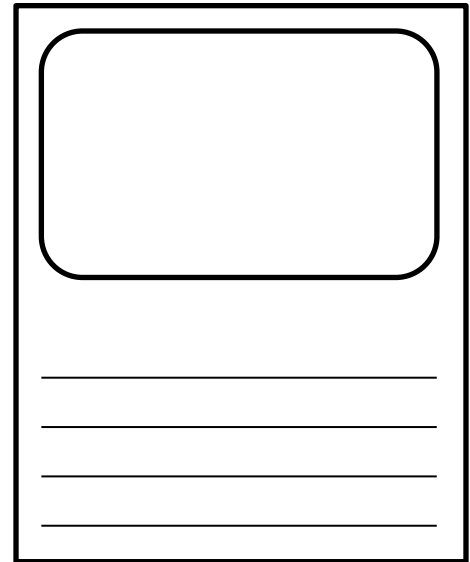

A storyboard panel consisting of a rounded rectangular frame at the top and four horizontal lines below it for text.

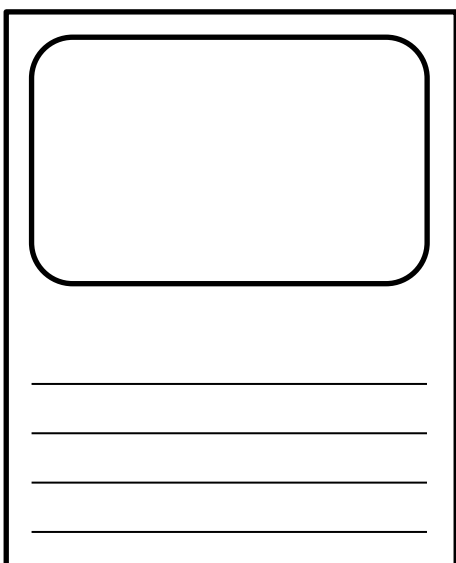

A storyboard panel consisting of a rounded rectangular frame at the top and four horizontal lines below it for text.

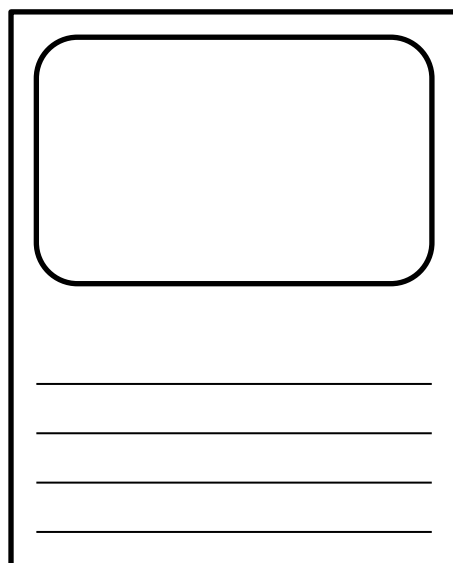

A storyboard panel consisting of a rounded rectangular frame at the top and four horizontal lines below it for text.

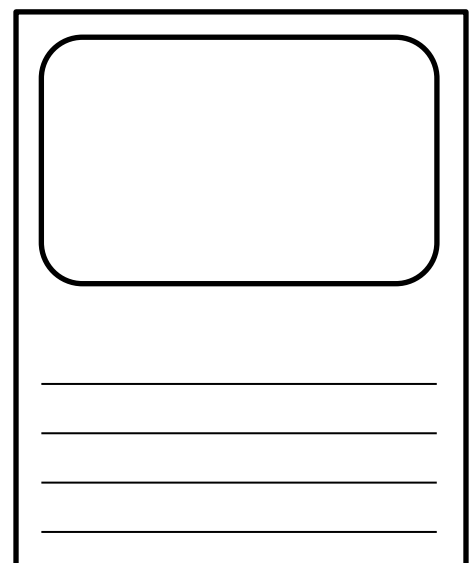

A storyboard panel consisting of a rounded rectangular frame at the top and four horizontal lines below it for text.

A storyboard panel consisting of a rounded rectangular frame at the top and four horizontal lines below it for text.

A storyboard panel consisting of a rounded rectangular frame at the top and four horizontal lines below it for text.

A storyboard panel consisting of a rounded rectangular frame at the top and four horizontal lines below it for text.

Teacher observation checklist (for formative assessment)

Teacher checklist										
Student Name	✓ if observed									Comments
	Works collaboratively	Works independently	Plans work	Uses equipment safely	Uses software efficiently and effectively	Provides assistance to others if, required	Seeks assistance, if required	Final product demonstrates concept		

Sample marking key (for summative assessment)

Sample marking key	
Description	Marks
Investigating and defining	
Aim of stop motion movie is clearly identified and consideration is given to all required components to be able to achieve an appropriate solution for the target audience.	4–5
Aim of stop motion movie is identified and some consideration is given to all required components to be able to achieve a solution for the target audience.	2–3
Aim of stop motion movie is presented with little thought to requirements to be able to achieve a solution.	1
Subtotal	5
Description	Marks
Producing and Implementing	
Uses a range of techniques, software and hardware safely to create a stop motion movie that demonstrates the selected concepts clearly and logically.	9–10
Uses a range of techniques, software and hardware safely to create a stop motion movie that mostly demonstrates the selected concepts clearly.	7–8
Uses some techniques, software and hardware safely to create a stop motion movie that demonstrates some of the select concepts clearly.	5–6
Uses some techniques, software and hardware to create part of a stop motion movie that demonstrates some of the select concepts.	3–4
Uses limited techniques, software and hardware to create part of a stop motion movie that demonstrates limited selected concepts.	1–2
Subtotal	10
Description	Marks
Collaborating and managing	
Works collaboratively and independently, as required, using appropriate digital technology tools to plan and create a stop motion movie that meets its aim.	4–5
Works collaboratively and independently, as required, most of the time, using digital technology tools to plan a stop motion movie that mostly meets its aim.	2–3
Works collaboratively and independently, some of the time, to create some of a stop motion movie.	1
Subtotal	5
Total	20
