[◀ Return to Languages](#)

The general capabilities are the dispositions that will help students to find opportunities to use their languages in the program for their learning, unless they are identified as having special needs.

Literacy

Students become literate when they can interpret and use language in a variety of contexts, both in school and for personal purposes. This includes listening to, reading and writing digital texts, and using language in a variety of contexts.

In the Languages, Literacy and Numeracy framework, literacy is developed through the transferable skills of language learners, and support to develop the following:

- developing an ability to use language in a variety of contexts
- mastering of grammar and syntax
- developing semantic and pragmatic skills

Numeracy

Students become numerate when they can use mathematics confidently in a variety of contexts, both in school and for personal purposes. Numeracy is developed through the transferable skills of mathematics in the

and cultural practices begin to see the connection in using language.

Learning a new language is enriching and cumulative, adding to the repertoire, providing a new perspective. Students come to realize the value of different languages and cultures, knowledge, understanding, and respect for culture(s). They realize that language is determined by what is spoken and written in language and culture.
