 Overview ABL TSIL Framework

The general capabilities and dispositions that will be developed through the program for the Languages are identified within the framework.

Literacy

Students become literate as they learn to interpret and use language in school and for particular contexts, such as listening to, reading digital texts, and using technology in various contexts.

In the Languages, literacy development is transferable across language learners, and support to develop literacy skills includes:

- developing an ability to understand and use language
- mastering of grammar and syntax
- developing semantic and pragmatic skills

Numeracy

Students become numerate as they learn to use mathematics confidently in a range of contexts.

to language learning capability. By learning to reflect on things present and cultural practices, students begin to see the connection between language and culture in using language.

Learning a new language is an enriching and cumulative process, providing students with a repertoire of different languages and cultures. Students come to realize that language knowledge, understanding of culture(s), and the ability to use language are determined by what they learn and how they use language and culture.
