The general capabilities are dispositions that will be developed through the program for the Languages. The general capabilities are identified within the curriculum.

Literacy

Students become literate in the Languages, which enables them to interpret and use language in school and for participation in society. Literacy involves listening to, reading and understanding digital texts, and using language in different contexts.

In the Languages, literacy development is transferable across language learners, and support to develop literacy skills includes:

- developing an ability to understand and use language
- mastering of grammar and syntax
- developing semantic and pragmatic skills

Numeracy

Students become numerate in the Languages, which enables them to

to language learning capability. By learning to reflect on things present in their own and cultural practices, students begin to see the connection between language and culture in using language.

Learning a new language is an enriching and cumulative process, providing students with a repertoire of different languages and cultures. Students come to realize that language knowledge, understanding, and use are determined by what they learn about language and culture.
